Romulus

New Earth orbits a star that doesn't really matter at a distance of 89 million mi

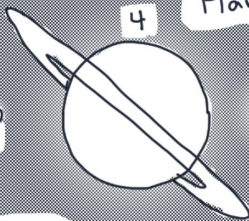

settled ~400 years ago after humanity discovered means of FTL travel

SPINE is a quickly growing faction of New Earth, set to do whatever it takes to secure its independence.

New Earth has 15 countries which were divided out among the highest paying corporations. While many have since overthrown their original corporate leadership in favor of actual governments, all 15 are still under the thumb of Earth's United Government, which stifles New Earth's growth with egregiously high taxes, artificial food scarcity, and taking most of New Earth's materials and products for itself.

THE GO-AROUND

Althea
Marsh

hi, it's me, un-named bunny girl from page 6. i broke up with that Ylik lookin ass dude and now i fuck women for fun and for profit!

Goodbye, September 2022

22 pages/31 days averages to
~71% of a page a day.
71 is a solid C grade,
which i don't think is too
bad for my first
monthly sketchbook,
but i still wanna do more
in October! i have a lot
of fun doing this and
i hope it shows :D

i think im gonna do a lot
of environmental drawing
next month. i also wanna
play with my paper + line colors.
dark blue or white has gotten
pretty stale...
